

1. AI DEVELOPMENT & AUTOMATION

SEO Title: AI Development & Automation Company | Pluginfy

Meta Description: Build intelligent AI solutions, AI agents and business automation with Pluginfy. Custom LLM integrations, workflow automation, Python AI development and enterprise AI solutions.

Suggested URL: `/services/ai-development-automation/`

AI Development & Automation That Creates Real Business Value

Build smarter workflows. Automate repetitive work. Turn AI into a competitive advantage.

Pluginfy designs and develops production-ready AI solutions that help businesses automate operations, improve decision-making and create intelligent digital experiences.

From AI agents and LLM-powered applications to document processing and complex workflow automation, we integrate artificial intelligence into the systems your business already depends on.

Our AI Development Services

- AI Agents & Assistants
- Generative AI Applications
- LLM Development & Integration
- OpenAI API Integration
- AI-Powered SaaS Applications
- Business Process Automation
- Intelligent Document Processing
- Retrieval-Augmented Generation (RAG)
- Knowledge Base Assistants
- AI Chatbots
- Data Extraction & Classification
- Machine Learning Solutions
- Custom Python AI Development

AI Agents Built Around Your Business

Generic chatbots aren't enough.

We build AI agents connected to your business data, APIs and workflows. They can retrieve information, process documents, interact with internal systems, trigger actions and assist employees or customers.

Possible applications include customer support, sales qualification, document analysis, reporting, internal knowledge search and operational automation.

Business Process Automation

Your team shouldn't spend hours performing tasks software can handle in seconds.

Pluginfy identifies repetitive processes and transforms them into automated workflows connecting your ERP, CRM, e-commerce platform, APIs and internal systems.

Automate the repetitive. Let your people focus on what requires people.

Technologies

Python · OpenAI · LLMs · LangChain · APIs · Vector Databases · Machine Learning · AWS · Azure · Google Cloud

Ready to Put AI to Work?

Tell us where your team is losing time. We'll help determine where AI and automation can create measurable value.

2. CUSTOM SOFTWARE DEVELOPMENT

SEO Title: Custom Software Development Company | Pluginfy

Meta Description: Custom software development for startups and enterprises. Pluginfy builds scalable SaaS platforms, business applications, portals, APIs and enterprise software.

Suggested URL: `/services/custom-software-development/`

Software Designed Around Your Business

When off-the-shelf software doesn't fit, we build what does.

Pluginfy designs and develops custom software for companies with unique processes, products and technology requirements.

From an initial idea to a production-ready application, our engineers handle architecture, frontend and backend development, integrations, infrastructure and deployment.

What We Build

- SaaS Platforms
- Enterprise Applications
- Internal Business Software
- Customer Portals

- Partner Portals
- Management Platforms
- Booking Systems
- Workflow Management Software
- Dashboards & Analytics
- API Platforms
- Multi-Tenant Applications
- Legacy Software Modernization

Built for More Than Launch Day

Good software needs to survive growth.

We design applications with scalability, maintainability, performance and security in mind so your technology can evolve alongside your business.

From Concept to Production

Discovery → Architecture → UX/UI → Development → Testing → Deployment → Support

You don't need to coordinate five different technology vendors. Pluginfy can support the complete software development lifecycle.

Our Technology Stack

Laravel · PHP · Python · Node.js · Next.js · React · Vue.js · TypeScript · PostgreSQL · MySQL · Redis · Docker · AWS · Azure · GCP

Have a Software Idea?

Bring us the problem, requirements or even a rough idea. We'll help turn it into a practical development roadmap.

3. ERP DEVELOPMENT

SEO Title: Custom ERP Software Development Company | Pluginfy

Meta Description: Custom ERP development and integrations from Pluginfy. Connect sales, inventory, purchasing, operations, reporting and e-commerce in one scalable system.

Suggested URL: `/services/erp-development/`

Custom ERP Solutions Built Around How Your Business Works

Stop forcing your operations into software that wasn't designed for them.

Pluginfy develops custom ERP solutions that connect departments, automate processes and provide a single source of truth across your organization.

ERP Modules We Can Build

- CRM & Sales
- Customer Management
- Order Management
- Inventory Management
- Purchasing & Procurement
- Supplier Management
- Warehouse Management
- Product Management
- HR & Employee Management
- Accounting Integrations
- Manufacturing Workflows
- Logistics & Fulfillment
- Reporting & Analytics
- Role & Permission Management

Connect Your Entire Operation

An ERP becomes significantly more powerful when it communicates with the rest of your technology.

We integrate ERP systems with:

E-Commerce Stores · Marketplaces · Payment Providers · Shipping Companies · Accounting Systems · CRM Platforms · Warehouse Systems · Third-Party APIs

Custom ERP vs. Generic ERP

Every organization develops processes that make it different.

Instead of changing those processes simply because your ERP requires it, we can build or customize a solution around the workflows that make your company effective.

Real-Time Business Visibility

Turn operational data into useful information with dashboards covering sales, orders, inventory, purchasing, customers, revenue and other important KPIs.

One system. Connected operations. Better decisions.

4. E-COMMERCE DEVELOPMENT

SEO Title: Custom E-Commerce Development Company | Pluginfy

Meta Description: Build scalable B2B and B2C e-commerce platforms with Pluginfy. Custom stores, marketplaces, integrations, plugins, checkout systems and commerce automation.

Suggested URL: `/services/ecommerce-development/`

E-Commerce Platforms Built to Sell and Scale

Pluginfy develops high-performance commerce solutions for businesses that need more than a standard online store.

We build everything from custom storefronts to complex B2B platforms, marketplaces and deeply integrated commerce ecosystems.

E-Commerce Development Services

- Custom E-Commerce Development
- B2B E-Commerce
- B2C Stores
- Multi-Vendor Marketplaces
- Headless Commerce
- Custom Checkout Development
- Payment Integrations
- ERP Integrations
- Marketplace Integrations
- Inventory Synchronization
- Shipping Integrations
- Subscription Commerce
- E-Commerce Plugins
- Store Performance Optimization

Connect Storefront and Operations

Modern commerce doesn't stop at checkout.

We connect your store with ERP, CRM, inventory, warehouse, accounting, payment and logistics systems to automate operations from purchase to fulfillment.

E-Commerce Platform Expertise

Our experience covers custom development and integrations across platforms including:

Shopify · Shopware · Magento · WooCommerce · BigCommerce · PrestaShop · OpenCart ·
PlentyMarkets and custom commerce platforms

Complex Commerce Is Where We Thrive

Different customer pricing? Multiple warehouses? B2B approvals? Product configurators? Marketplace synchronization? Custom fulfillment?

That's exactly the type of problem we're here to solve.

5. LARAVEL & PHP DEVELOPMENT

SEO Title: Laravel & PHP Development Company | Hire Laravel Developers | Pluginfy

Meta Description: Expert Laravel and PHP development for SaaS, APIs, ERP, e-commerce and enterprise applications. Build, modernize or scale your PHP platform with Pluginfy.

Suggested URL: `/services/laravel-php-development/`

Laravel & PHP Development for Serious Applications

Pluginfy builds robust backend systems using Laravel and PHP for businesses that need reliable, scalable and maintainable software.

From new SaaS products to complex ERP platforms and existing application modernization, our engineers can work across the complete PHP ecosystem.

Laravel Development Services

- Custom Laravel Applications
- Laravel SaaS Development
- Laravel ERP Development
- REST API Development
- E-Commerce Backends
- Third-Party Integrations
- Payment Integrations
- Legacy PHP Modernization
- Laravel Performance Optimization
- Application Maintenance
- Database Optimization
- Architecture & Code Refactoring

Already Have a Laravel Application?

We don't only build new systems.

Our engineers can step into existing Laravel and PHP applications to fix technical debt, develop new functionality, improve performance, upgrade frameworks and prepare applications for future growth.

Backend. APIs. Integrations. Infrastructure.

We understand the complete environment surrounding Laravel applications — databases, queues, caching, APIs, frontend applications, containers and cloud infrastructure.

Need Laravel Expertise?

6. PYTHON DEVELOPMENT

SEO Title: Python Development Company | AI & Backend Development | Pluginfy

Meta Description: Custom Python development for AI, automation, APIs, data processing and backend applications. Build scalable Python solutions with Pluginfy.

Suggested URL: `/services/python-development/`

Python Development for AI, Automation & Scalable Backends

Python powers some of today's most capable AI, automation and data platforms.

Pluginfy uses Python to develop intelligent applications, backend services, APIs, automation systems and data-processing solutions.

Python Development Services

- AI Application Development
- LLM Integrations
- Automation Software
- Backend Development
- REST APIs
- Data Processing
- Data Extraction
- Machine Learning
- Microservices
- Third-Party Integrations
- Internal Business Tools

- SaaS Backends

Python + AI

Our Python engineers build applications around modern AI technologies, including LLMs, AI agents, vector databases and machine-learning pipelines.

Python + Automation

We use Python to connect systems and eliminate repetitive manual processes — from processing thousands of documents to synchronizing information between platforms.

Python + Your Existing Systems

You don't necessarily need to replace your current technology.

Python services can integrate with Laravel, PHP, Node.js, ERP systems, e-commerce platforms and third-party APIs.

Build With Python →

7. REACT, NEXT.JS & VUE.JS DEVELOPMENT

SEO Title: React, Next.js & Vue.js Development Company | Pluginfy

Meta Description: Build fast modern web applications with React, Next.js and Vue.js. Pluginfy develops SaaS products, dashboards, portals and e-commerce frontends.

Suggested URL: `/services/frontend-development/`

Modern Frontend Development That Feels Fast

Users judge software in seconds.

Pluginfy develops responsive, high-performance interfaces using React, Next.js and Vue.js for SaaS platforms, enterprise applications, dashboards and e-commerce experiences.

Frontend Development Services

- React Development
- Next.js Development
- Vue.js Development
- SaaS Frontends
- Enterprise Dashboards
- Customer Portals
- Headless E-Commerce

- Progressive Web Applications
- API Integrations
- Existing Frontend Modernization
- Performance Optimization

Next.js Development

Build SEO-friendly, high-performance applications using one of the leading React frameworks for modern web development.

React Development

From interactive dashboards to sophisticated SaaS products, we create reusable and maintainable React architectures designed to grow.

Vue.js Development

For projects where Vue provides the right balance of flexibility and simplicity, our engineers can develop complete applications or extend existing Vue platforms.

Frontend Meets Backend

A beautiful interface is useless without reliable systems behind it.

Our frontend engineers work alongside backend, API, database and DevOps specialists to deliver complete applications rather than disconnected screens.

Build Your Web Application →

8. DEVOPS & CLOUD ENGINEERING

SEO Title: DevOps & Cloud Engineering Services | Pluginfy

Meta Description: DevOps consulting and cloud engineering for AWS, Azure and GCP. CI/CD, Docker, Kubernetes, infrastructure automation, migration and monitoring.

Suggested URL: `/services/devops-cloud/`

DevOps That Helps Your Team Ship With Confidence

Infrastructure shouldn't become the reason your product can't move quickly.

Pluginfy helps businesses automate deployment, modernize infrastructure and operate scalable cloud environments.

DevOps Services

- CI/CD Implementation
- Cloud Architecture
- AWS Infrastructure
- Azure Infrastructure
- Google Cloud
- Docker
- Kubernetes
- Infrastructure as Code
- Terraform
- Server Migration
- Cloud Migration
- Monitoring & Logging
- Backup Strategies
- Performance Optimization
- Infrastructure Automation

Automate Your Deployment Pipeline

Replace manual deployments with predictable CI/CD workflows that automatically build, test and deploy applications.

Cloud Architecture

We design infrastructure around the actual requirements of your application — availability, traffic, security, performance and cost.

Containers & Kubernetes

For platforms requiring containerized architecture, we implement Docker and Kubernetes environments designed for reliable deployment and scaling.

Deploy Faster. Operate Smarter.

Talk to a DevOps Engineer →

9. PLUGIN & API DEVELOPMENT

SEO Title: Custom Plugin & API Development Services | Pluginfy

Meta Description: Custom plugin, API and integration development for e-commerce, ERP, SaaS and business platforms. Connect your software and automate workflows with Pluginfy.

Suggested URL: `/services/plugin-api-development/`

Connect the Software Your Business Depends On

Modern companies rely on dozens of platforms. The problem begins when those platforms don't communicate.

Pluginfy develops custom plugins, APIs and integrations that connect software, synchronize information and automate business processes.

Plugin Development

We build plugins and extensions that add new capabilities to existing software and commerce ecosystems.

Our experience includes plugins and integrations for platforms such as:

**Shopify · Shopware · Magento · WooCommerce · BigCommerce · PrestaShop · OpenCart ·
PlentyMarkets and custom platforms**

API Development

- REST API Development
- API Architecture
- Third-Party API Integration
- Payment APIs
- ERP APIs
- Marketplace APIs
- Shipping APIs
- CRM APIs
- Webhooks
- Authentication
- Data Synchronization

Make Your Systems Talk

Imagine:

**Customer places order → inventory updates → ERP receives order → invoice is generated →
warehouse receives fulfillment request → tracking returns to customer.**

No spreadsheets. No copying information. No repetitive manual work.

That's what good integration engineering enables.

These FAQs can also be adapted to individual service pages.

Frequently Asked Questions

How much does custom software development cost?

Development cost depends on product complexity, integrations, architecture, team requirements and project duration. After an initial discovery conversation, we can define the technical scope and provide a clearer estimate.

Can Pluginfy work with our existing development team?

Yes. We can operate as a complete product team or work alongside your internal engineers to provide additional development, AI, frontend, backend or DevOps expertise.

Can you take over an existing project?

Yes. We can review an existing codebase, understand its architecture and technical debt, and create a plan for further development or modernization.

Do you provide ongoing maintenance?

Yes. Software rarely stops evolving after launch. Pluginfy can provide ongoing development, monitoring, infrastructure support, optimization and maintenance.

Do you work with startups or enterprise companies?

Both. We can help startups move from concept to MVP and support established businesses developing or modernizing larger platforms.

Can you integrate AI into our existing software?

Yes. You don't necessarily need to rebuild your application to introduce AI. We can create AI services and APIs that integrate with your existing ERP, SaaS, e-commerce or internal systems.

SITE-WIDE CTA

Have a Complex Technology Challenge?

That's usually where the interesting work begins.

Tell us what you're building, what isn't working, or what you want to automate.

We'll help you identify the right technical approach.
